## Let's Get America Moving Again...

**The AutoBlanket® Staple System is committed to developing the most efficient methods to install erosion control blankets, bunker liners and geotextiles.**

### The AutoBlanket® Staple Tool

The AutoBlanket® Staple Machine is available in 5-1/4 in., 6 in. or 7 in. sizes. Our pneumatic stapler for erosion control and bunker renovations will enable your crews to install ECB's or bunker liner up to 3 times faster using our stapler rather than conventional methods.

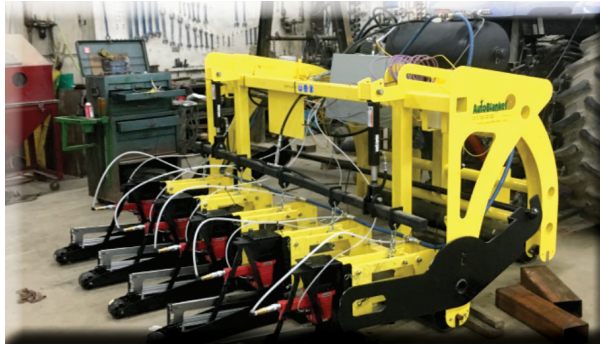

The AutoBlanket® hand held stapler will increase the productivity of your crews enabling them to install more blanket per day with less effort.

**Pneumatic Stapler**

### The AutoBlanket® Staple Machine

- Plug and Work System; Start Installing
- Erosion Blanket in Minutes
- True Float System for the 5—6" Staplers
- **Eaton** Operator Interface
- Top-link Hydraulic 3 Pt. Hitch
- Faster Operating Speed
- **50 CFM** Compressor and 16' wide Blanket Install is Available !!

### Pneumatic Staplers

*NEW FOR 2020*

The AutoBlanket II will roll out the ECB and your crews will stable the blanket with our pneumatic staplers.

**Erosion Blanket Installed on Waterway Project**

### Walking Stick Attachment

The Walking Stick Attachment for the WP150 Pneumatic Staple tool will enable your crews to install staples with less fatigue. No more bending down to install staples for erosion control blanket, bunker liner or geotextiles fabrics.

The WP150 Walking stick has been updated again to fit our pneumatic stapler. The walking stick can be quickly removed from the pneumatic stapler for tight areas.
